## JHG – Microsoft Retail Management System Customer Loyalty for HQ and Store Operations

The JHG Customer Loyalty Module is extremely flexible, allowing complete control over your loyalty program and rewards to your customer. By setting a few options you can accumulate points based on a customer's purchases or by each visit. You can set a maximum and minimum requirement for accumulated points. Set up a reward item that enforces the purchase of a particular stock item in order to be redeemed. Set up multiple rewards that can be selected at the checkout station. This module will keep your customers coming back!
